Detailed Action

Response to Amendment

Claims 1-4 are pending. This action is in response to the amendment RCE July 7, 2008.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-4 have been amended to recited “wherein said steps of automatic checking, determining and placing a counter bid produce delay paced proxy bidding by specifying a counter bid delay value that does not escalate said pace of bidding within said auction system by automated placing of said counter bid” which does not appear to be in the originally filed specification. Thus, the recitation must be treated as “new matter”. However, if the applicant does not believe that this subject matter is “new matter”, an appropriate explanation is required including pointing out where support for this subject matter can be found in the origin specification.
